## **Introduction**

Computer use is often a valuable and necessary component of an employee's work. School use must be in support of education and research and consistent with educational objectives. In addition, varying work responsibilities result in access to information sources such as software, programs, the Internet, district network, etc.

Although employees may have access to these information sources, their use must be authorized. Access and authorization to information and equipment carry a corresponding responsibility to their appropriate use. District equipment and access is intended to be used for educational and professional or career development activities.

Outside of school, families can give the same guidance of Internet use as they exercise with information sources such as television, telephones, radio, movies, and other possibly offensive media.

Families should be aware that some material accessible via the Internet may contain items that are illegal, defamatory, inaccurate, or potentially offensive to some people. In addition, it is possible to purchase certain goods and services via the Internet, which could result in unwanted financial obligations for which a student's parent or guardian would be liable.

The District's Acceptable Use Policy is to prevent unauthorized access and other unlawful activities by users online, prevent unauthorized disclosure of or access to sensitive information, and to comply with the Children's Internet Protection Act ("CIPA"). As used in this policy, "user" includes anyone using the computers, Internet, email, chat rooms and other forms of direct electronic communications or equipment provided by the District (the "network."). Only current students and employees are authorized to use the network.

All users, including students, teachers, administrators, and educational organizations are covered by this policy and are expected to be familiar with its provisions.

## **Acceptable Uses of the Computer Network or the Internet**

The resources available are for educational purposes. Users should not store any files that are not educational.

Schools must verify each year that students using the computer network and Internet access for that school year have a signed page acknowledging this policy. Students who are under 18 must have their parents or guardians sign this page and schools must keep it on file. Once signed that permission/acknowledgement page remains in effect until revoked by the parent, or the student loses the privilege of using the District's network due to violation of this policy or is no longer an Juab School District student. Employees and other users are required to follow this policy. Even without signature, all users must follow this policy and report
